

Repair & Rejuvenate

Stem Cell Recruitment Facial™ can dramatically improve the appearance of aging, damaged, and post-procedure skin. By using cryopreserved amniotic fluid, this new therapy can recruit your own body's stem cells to transform your skin cells to a younger, more fortified state.

Patients have reported healthier, stronger, and younger looking skin.

Amniotic Fluid:

- Safe & non-surgical
- Pure and ethically sourced
- Safe for all skin types
- No patient rejection or immune response
- FDA Regulated

Rejuvenate Skin & Fight Aging

www.russellhealth.com

Repair & Regenerate

AF helps regenerate new skin cells within the epidermis and repair damaged skin cells within the dermis.

Fight Aging

AF diminishes fine lines and wrinkles, promotes skin rejuvenation and improves skin pigmentation.

Strong, Healthy Skin

Stem Cell Recruitment Facial™ helps promote collagen and elastin formation, which slows naturally over time.

A Harvard Study found a growth factor in Amniotic Fluid called GDF-11, which regulates cell growth and differentiation in embryonic and adult tissues. GDF-11 is being referred to as "the Fountain of Youth" hormone by the Harvard Study.¹

Just the Facts

A New Kind of Therapy

The large number of growth factors within the amniotic fluid help stimulate collagen production, healthy circulation, antioxidant activity, and cellular renewal.

"Fountain of Youth Protein" in Amniotic Fluid

The Growth Differentiation Factor 11 (GDF11) in amniotic fluid is being referred to as the "Fountain of Youth" protein by researchers at Harvard. A Harvard University team has reported that a protein called GDF11 helps explain why young blood can rejuvenate several tissues, such as dermal tissues.

What People are Saying

Physician's global assessment of pigmentation and wrinkles after treatment revealed statistically significant effects of microneedling plus human mesenchymal stem cells from amniotic fluid compared to microneedling alone.

Hee Jung Lee & Eo Gin Lee

Efficacy of Microneedling Plus Human Stem Cell Conditioned Medium for Skin Rejuvenation: A Randomized, Controlled, Blinded Split-Face Study (2014)

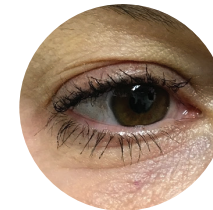

My wrinkles are noticeably less visible. The texture and color of my skin is better in just 6 days. I can't wait to see how far this will take me!

Theresa D.

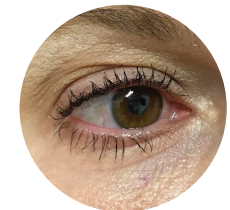

Facial Therapy Client

Long-Lasting Results

Patients have reported full results lasting 6-8 months! SCR Facial utilizes the body's own regeneration process—therefore after the initial treatments, facial skin renewal is continual for about 2-3 months after the procedure.

Before Treatment

1 Month After

"Amazing!! And it will continue to look better over the next two months."

Amie M.

Nurse Practitioner
